Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: With respect to the previous rejection under 35 USC 101 of claims 12 and 13, the examiner agrees that the amendments to claims filed 10 August 2007 overcome this rejection. With regard to whether or not Figs. 16A, 16B, 17A, and 17B are prior art, the examiner presented applicant's representative with a copy of the pages of the SBP-2 specification as evidence that Figs. 16A, 16B, and 17A are prior art. The examiner was not able to quickly locate the reason for indicating that Fig. 17B is prior art. Applicant may file amendments to those drawings. With regard to the prior art rejections, applicant's representative argued that the SBP-2 specification is only directed to peer-to-peer devices with one device being able to login to the instrument at a time, while applicant's invention includes a second port for a second device. The examiner did not make any commitment with regard to whether or not he agrees that the claims distinguish over the prior art, but the arguments will all be considered.

Interview Agenda:

The SBP-2 specification fails to disclose or suggest that the port controller sets the second port to a disabled state and, after the second port is set to the disabled state, the bus reset issue controller issues the bus reset to cause the first electronic instrument connected with the first port to acquire an access right, as recited in independent claim 1. Specifically, SBP-2 is developed for a peer-to-peer data transfer is not specified on the assumption that a plurality of ports P1 and P2 exist.
